MGS: KOKO P

Alis is a homozygot polled fair bull with TOP exterior and breeding values. He was born on the farm of Mr. and Mrs. Chlupáček as a son of Umbro (the best czech bull for growth). Mother is a German cow Elis with excellent growth, she belongs to TOP 3% in maternal effect. Alis is a significant improver of growth and exterior. His sons were the best evaluated bulls at performance test station this year. We recomend to use him for bigger heifers.
